

PCDN

Primary Care Diabetic Nephropathy

Primary Care Diabetic Nephropathy

An opportunity to host a free of charge Specialist-led Diabetic Nephropathy service to help achieve QOF and NICE guidelines and improve Patient Outcomes.

Why PCDN?

- The management of diabetic nephropathy is a major clinical and societal issue because of its widespread prevalence, and massive health and financial burden;
- Patients with advanced diabetic nephropathy can have a poor prognosis in terms of kidney function and a high risk of atherosclerotic cardiovascular disease
- The first step in treating diabetic nephropathy is to treat and control diabetes and, if needed, high blood pressure (hypertension). With good management of blood sugar and hypertension, you can prevent or delay kidney dysfunction and other complications.

PCDN is:

- A specialist-led service;
- Delivered within your practice premises;
- NOT a drug switch programme, despite funding being made available from the pharmaceutical industry.

Currently delivered via teleconsultations to ensure patients can stay home, Protect the NHS and save lives

If you are interested in hosting the FREE PCDN service in your practice please: Email: info@inspira-health.co.uk Call: 0330 1330 798
Or visit: www.inspirahealth.co.uk

Phase 1 – System Interrogation

- Running bespoke queries on GP practice clinical system.

Phase 2 – Clinical Audit

- Comprehensive case note review of patients with diabetic nephropathy;
- Assessing current management and compliance with NICE guidelines (TA288, TA315, TA336, and TA418).

Phase 3 – Patient Invitations

- Systematic patient invitation.

Phase 4 – Consultant Reviews

- Specialist-led clinics hosted within your practice premises;
- 1-1 clinical education with a specialist;
- Optimising treatment and management of high risk diabetic nephropathy patients.

Phase 5 – Completing the Audit Loop

- Ensuring that recommendations have been carried out;
- To demonstrate best practice and local guidelines have been enacted;
- To provide a pre and post-PCDN report.

You will receive a number of benefits hosting the PCDN service, including:

- A significant improvement in the quality of your diabetic disease registers;
- Achieving improved QOF indicators, thresholds and income;
- Increased knowledge, awareness and confidence in current evidence-based treatment strategies for diabetic nephropathy disease (NICE TA288, TA315, TA336, and TA418);
- More patients accessing specialist advice/treatment for managing diabetic nephropathy; and therefore improving patient outcomes within the practice population.
